

March for a CURE

Hi! My name is Gavin, I'm 7 years old. I love Star Wars, Dinosaurs, Lego's and Roller skating. I also have an auto-immune disease called Eosinophilic Gastroenteritis. My body mistakes food proteins as an allergy and sends white blood cells to attack my GI Tract. Whenever I eat a food I'm allergic to I have painful symptoms of chronic vomiting, trouble swallowing, severe stomach pain, diarrhea, leg pain and fevers.

There is no cure for Eosinophilic Disease, it's a rare disease and little research has been conducted due to poor funding. For now the only way to treat this disease is to avoid the foods I'm allergic to. I can only eat apples, rice and a special formula. Please join us as we raise funds to support kids like me and to find a cure!

CURED is a non-profit organization that donates 100% of profits received to Eosinophilic Disease Research.

Registration and donation forms can be found online at:

www.curedfoundation.org

Under fundraising tab click on March for a CURE
